

TECHNICAL DATA

Concrete Slide Concentrate Concrete Remover

Product Description and Purpose

Concrete Slide Concentrate is an amazing cleaner that utilizes state of the art surfactant technology and small molecular size to penetrate deep inside concrete residues and react from within. It is this unique formulation that makes it ideal for cleaning and maintaining tools, equipment, and vehicles. **Concrete Slide Concentrate** is strong enough to quickly and easily remove concrete on contact. This product does NOT contain muriatic, sulfuric, phosphoric, hydrofluoric, or hydrochloric acids. It can be used on most metal, painted and plastic surfaces without any concern for etching or damage.

Features/Benefits

- Concentrated
- Economical to use
- Organic Salts and Surfactants
- 100% Biodegradable

General Usage Directions

Apply at full strength with a pump up sprayer or brush. Ideal application is to submerge the parts to be cleaned into a 5 gallon bucket of **Concrete Slide Concentrate**. You will notice a fizzing action that ensures the product is working, once the fizzing subsides, the product has completed its cycle and the parts are ready to be rinsed with a high pressure wand or scraper.

Heavy build-up on tools may require additional applications until all concrete is removed. For vertical surface continue to re-apply until concrete is loosened enough to power wash the surface clean.
