

K-PW 72

7070

TECHNICAL DATA

Spray Cabinet Cleaner

Product Description and Purpose

K-PW 72 is a ferrous metal safe powdered cleaner that is safe for use on most aluminum alloys. **K-PW 72** may also be used in multi-stage industrial spray washers. This product contains a biodegradable surfactant that is effective in removing all shop soils. **K-PW 72** is a low level caustic cleaner that is suitable for use in areas of hard water. This product is NOT suitable for aluminum parts. **K-PW 72** effectively eliminates water spotting due to hard water.

Features/Benefits

Economical

Concentrated

General Usage Directions

For high-pressure spray cabinets cleaning automotive engine blocks, heads, etc, use 1# /5gal. of water. For multi-stage industrial spray washers, use 1 to 3 oz. per gallon. Use **K-PW 72** @ 70° - 160° F. **K-PW 72** is recommended as a general purpose cleaner covering a wide range of water and soil conditions. **K-PW 72** is low foaming permitting its use in the above-mentioned spray washing units.

Physical Properties

Form	Orange powder
Rinse ability	Complete
Odor	Citrus
Foaming	Low, controlled
Emulsification	Complete
Causticity (as NaOH)	Low
pH (5%/wt)	13.0-14.0

TECHNICAL DATA

Caution

KEEP OUT OF REACH OF CHILDREN. Keep container tightly closed when not in use. As with all highly alkaline hot tank cleaners, caution should be exercised when initially charging the tank or making additions to a hot or cold solution of **K-PW 72**. Make additions in small increments and spread the powder over a broad area of the tank surface. **DO NOT** dump large quantities of the cleaner into the tank all at once. Dumping **K-PW 72** into the tank will generate an “exothermic” reaction causing very hot, highly alkaline solution to explode from the tank with obvious disastrous results.
