

# TECHNICAL DATA

## CK 45

### Penetrating Lubricant

#### Product Description and Purpose

**CK 45** is a high tech formulation of specific oils blended with micron-sized PTFE to provide exceptional long lasting lubrication and penetration. **CK 45** significantly decreases friction and distributes a wear-resistant film that lubricates moving parts. The initial foaming action allows for dwell time so it can creep into tight spaces. **CK 45** penetrates rapidly to loosen frozen parts due to rust, wear, or heavy grease build up. The lubricating film guards surfaces from corrosion in extreme hot and cold temperatures. Use **CK 45** on any surfaces that glides, slides, rolls, twists, or moves. Passes ASTM D 1748 - Rust protection by metal preservatives in the humidity cabinet.

#### Features/Benefits

- Excellent Long-Lasting Lubrication
- Defends Against Corrosion
- Works in Broad Temperature Ranges
- Use on all surfaces that slip, slide, rub, roll, move, turn, twist or pivot
- Penetrates Rapidly
- Dissolves Grease

#### General Usage Directions

1. Shake well before using.
2. Spray liberally on frozen or corroded part.
3. Let stand for several minutes to allow thorough penetration.
4. Reapply for long-lasting protection.

#### Physical Properties

|       |                |
|-------|----------------|
| Form  | Aerosol        |
| Color | Colorless      |
| Odor  | Characteristic |

#### Caution

Keep out of reach of children. Keep container tightly closed when not in use. Protect from freezing. For industrial use only. Read Safety Data Sheets for more information.
