

IGO 220

4550

TECHNICAL DATA

Product Description and Purpose

IGO 220 series oils are Extreme Pressure Industrial Gear Oils made premium grade products based on the highest quality petroleum base stocks. They are formulated using an effective sulfur-phosphorus extreme pressure additive, rust and oxidation inhibitors and an anti-foam additive. The products exhibit excellent demulsification properties. As a result, these products are recommended for heavy-duty industrial uses where conditions require superior performance and long-term durability. The products meet the performance requirements of the American Gear Manufacturers Association (AGMA) Specification 250.04 for extreme pressure lubricants and U.S. Steel Specification No. 224.

Features/Benefits

Rust Inhibitor
Anti-Foam additive

Physical Properties

Form	Liquid
Color	Clear Amber
Odor	Petroleum Odor
Specific Gravity	0.869

Caution

Keep out of reach of children. Keep container tightly closed when not in use. Protect from freezing. For industrial use only. Read Material Safety Data Sheets for more information.
